Table of contents

Foreword
Preface
Acknowledgements
Organisation
Author Index

Keynote papers
Strength, stability and postbuckling behaviour
Joints and connectors
Steel-concrete composite construction
Cold-formed profiles and sheeting
Aluminium structures
Lateral buckling and effect of bracings
Dynamics, impact and seismic analysis
Bridges and footbridges
Structural steel, metallurgy and behaviour in fire
Industrial and spatial structures
Effect of imperfections and nonlinear static analysis
Structural optimization and expert systems
Structural safety and assessment
Effect of wind loading on structures
Cable and prestressed structures
Miscellaneous problems: architecture, glass and tolerances
Keynote papers

Cold-formed steel structures
*A. Biegus*

Advanced analysis of steel frames – from theory to practice
*W.F. Chen & S.L. Chan*

Modelling, analysis and design of steel semi-continuous frames
*M.A. Giżejowski, A.M. Barszcz, A. Kozłowski & L. Ślęczka*

Contemporary aluminium structures: State-of-the art in application, research and codification
*F.M. Mazzolani*

Resolving complex behavioural issues in composite construction by appropriate numerical modelling
*D.A. Nethercot*

Some problems of calculation and design of cable structures
*Sz. Pałkowski*

Conceptual design of light structures
*J. Schlaich*

Project orientation of the company as a factor of competitive advantage on the global market – case study
*S. Sroka*
Strength, stability and postbuckling behaviour

The analysis of the coefficients of buckling length of chords for out-of-plane instability of small-bay trusses
A. Biegus & D. Wojczyszyn

The peculiarities of buckling and strength analysis of frame elements of I-shaped cross-section with variable web height
S.I. Bilyk

Nonlinear analysis of elastically supported shallow steel arches
M.A. Bradford, Y.-L. Pi & F. Tin-Loi

Computer aided design of steel members to Eurocode 3
A. Czechowski & K. Kociatkiewicz

Incremental launching of a bridge steel structure over cylinder rollers and stability of a plate girder in a region over the rollers
J. Fonseca & B. Stankiewicz

Experimental investigations of the behaviour of angle struts
M.A. Gizejowski, A.M. Barszcz, J.D.G. Foster, J. Uziak & O.J. Kanyeto

Effective width equations according to the theory of plasticity
T. Hansen & M.P. Nielsen

Patch load carrying capacity of corrugated web
K.R. Kuchta

Interaction formulas of strength in analysis of steel frames
A. Machowski & P. Zwirek

A new design formula for determining the load-bearing capacity of locally supported shells
H. Pasternak & S. Komann

Analysis of post – buckling behaviour of steel thin – walled columns
M. Piekarczyk & G. Kubieniec

continued on next page
Contact design strength of steel in bearing elements
K. Rykaluk

Error estimation in calculations of RHS frames with standardized semi-rigid joints loaded by repeated loading
J.K. Szlendak
Joints and connectors

Influence of corrosion on load capacity of the bolted joints
J. Henzl & J. Studnicka

On the pull-out phenomenon of bolts from steel bolted plate connections: A laboratory testing and numerical approach
P. Iványi, M.D. Zygomalas & C.C. Baniotopoulos

Structural behaviour of anchor plates with welded studs
U. Kuhlmann & M. Rybinski

Numerical model of perforated shear connector
J. Marecek, P. Chromiak & J. Studnicka

Mathematical modelling of a rectangular web panel of a beam-to-column steel joint
G.T. Michaltsos, J.Ch. Ermopoulos & I.G. Raftoyiannis

End-plate steel joint with four bolts in the row
Z. Pisarek & A. Kozłowski

Modeling of steel joint for composite structures
Z. Pisarek & A. Kozłowski

Examples of errors in the design of welded constructions and their production in the aspects of the PN-B-06200:2002 standard requirements
M. Szubryt & M. Łomozik

Modelling of the storage rack joints
L. Ślęczka & A. Kozłowski

Mechanical model for assessment of the stiffness of bolted flanged joint
A. Wojnar & A. Kozłowski

The effort of an asymmetric joint with blind-bolts of sheet-metal sections
W. Wuwer

continued on next page
The rigidity of flexible lap-joints subjected to complex loads
W. Wuwer & B. Kowolik

Selected problems concerning load-bearing capacity and deformity of lap joints of thin-walled profiles, made up with glue and self-drilling screws
W. Żółtowski & P.A. Król
Steel-concrete composite construction

Push testing procedure for composite beams with deep trapezoidal slabs
M.A. Bradford, A. Filonov & T.J. Hogan

Comparison of the critical failure surface for I-section steel, I-section steel-concrete composite and reinforced concrete section columns
T. Jankowiak & M. Szumigała

A time dependent carrying capacity of composite columns
Z. Kowal

Experimental behaviour of composite slabs
E.M.F. Lopes & R.A.D. Simões

New composite floor with all-metal sandwich panel
P. Mäkeläinen & Z. Liu

Analysis of composite girders with undulating web and connectors STRIPCON
J. Motak & J. Machacek

Inelastic restrained distortional instabilities in continuous composite T-beams
Z. Vrceilj & M.A. Bradford

The behaviour of steel-concrete composite columns with battened steel sections
W. Żółtowski, E. Szmigiera & M. Siennicki
Cold-formed profiles and sheeting

Analysis of effectiveness of multispans thin-walled structures having cross sections locally doubled
A. Biegus & D. Czepiżak

Research of hyperbolic envelopments at their transformation in a plane
Y.U. Davydov

Experimental tests on sheathing-to-stud screw connections
L. Fiorino, G. Della Corte & R. Landolfo

Loadbearing capacity of corrugated arch sheets with imperfections
M. Gwóźdź & M. Suchodola

The properties of twisting profiled metal sheet T55
Z. Kielbasa

Economical efficiency of a cold-formed steel section for construction of industrial portal frames
L.F. Santos & L. Simões da Silva
Aluminium structures

Numerical evaluation of the response of welded aluminium joints in the context of the component method
J. Andrade, L. Simões da Silva & À. Lamas

Buckling of SHS aluminium EN AW-6063 alloy members
A. Bedynek, T. Sokót, A. Glinicka, M.A. Gáżejowski & É. Real

Experimental tests on stiffened aluminium shear panels
G. De Matteis, S. Panico & F.M. Mazzolani

Prediction of the flexural behaviour of “aluminium – lightweight concrete” composite girder
T.W. Siwowski

The static behavior of hollow aluminium bridge deck panel: Comparison of test results with theoretical and FEM analysis
T.W. Siwowski & P.K. Zólkowski

Experimental determination of the rotation of aluminum base plates for curtain walls
M.D. Zygomalas
Lateral buckling and effect of bracings

The influence of the rafter flange bracing on the behaviour of a plane frame
J. Goczek, J. Juchniewicz & Ł. Supel

Numerical assessment of critical resistance of spatial buckling of laterally braced I-shape columns
B. Gosowski & P. Niżniowski

A simple approach for the determination of the critical lateral-torsional buckling moment of steel web-tapered I-beams
I.G. Raftoyiannis & J.Ch. Ermopoulos

The effect of residual stresses on the manner of destruction of beam with monosymmetrical cross-section
A. Rawska-Skotniczny & R. Jankowiak

The influence of head plates on the $M_{cr}$ of thin walled beams
K. Rzeszut, Z. Kurzawa, M. Chybiński & A. Świtek

Stability analysis of bisymmetrical tapered I-beams
J. Żmuda, R. Jankowiak & U. Karasińska
Dynamics, impact and seismic analysis

Behaviour of roll over protective structures
B. Clark, D.P. Thambiratnam & N. Perera

Moment connection of steel beam to double-I built-up column using side plates
A. Deylami & M.R. Shiravand

Seismic performance assessment of steel moment resisting frames
L. Di Sarno

The dynamic response of a highway bridge under actual traffic load
D. Markulak, D. Varevac & N. Truhar

Impact and energy absorption of tapered rectangular tubes
G.M. Nagel & D.P. Thambiratnam

Evaluation of the ductility demand in partial strength steel structures in seismic areas using non-linear static analysis
P. Nogueiro, R. Bento & L. Simões da Silva
Bridges and footbridges

Determination of steel road bridges durability
T. Alkhafaji, M. Wróbel & H. Zobel

Structure, design and construction of a steel orthotropic bridge in Sofia
B. Bankov, D. Partov & D. Dinev

Deformation of soil-steel bridges under live loads
Cz. Machelski & G. Antoniszyn

Design and construction problems of inclined arch footbridge

3D structural behavior of composite I-girder bridges without intermediate cross beams
M. Nagai, N. Fujikawa, N. Sakurai & E. Iwasaki

Natural thermal actions on steel bridges in Poland according to PN-EN 1991-1.5
D.S. Sobala
The effect of thermomechanical processing (TMP) on the morphology of the Si phase in semi solid A356 Alloy
M. Haghshenas, A. Zarei-Hanzaki & A.R. Hemmati

Integrated blast and fire analysis of steel structures
J.Y. R. Liew & H.X. Yu

Fire resistance of steel beam-columns
M. Maslak

Trends of using high-strength steel for heavy steel structures
F. Schröter

Design of corrugated sheets exposed to fire
Z. Sokol & F. Wald

Temperature of fin-plate beam-to-beam connections
F. Wald, A. Tichá, E. Kadioglu & H. Bouchair

The influence of alloy elements in metal weld deposit on the exploitation of steel structures
T. Węgrzyn
A 72 m diameter dome roof for sports complex
G.V. Kalashnikov, V.I. Meytin, A.B. Pavlov & V.A. Savelyev

Multipurpose sport hall and covered Olympic swimming pool in seismic zone – Aleppo (Syria)
S. Kuš, Z. Kamel & Z. Plewako

Basis of design of overhead electrical lines according to general requirements of European standard EN 50341-1:2001
Z.K. Mendera

New trends in design and construction of public-purpose civil buildings and engineering structures with metal work application
A. Shimanovsky, V. Gordeyev & A. Ogloblya

The cause of collapse and rehabilitation of steel tanks roof structures
F. Turcic, I. Luketina & M. Plisic

Adjustment of the overhead travelling crane track on a steel trestle bridge by means of the graphical and analytical methods
B. Wichtowski & B. Jankowska

Specific risks for local stability and load capacity of vertical double-shell cylindrical steel tanks
J. Ziółko, E. Supernak & T. Mikulski
Effect of imperfections and nonlinear static analysis

The substitute imperfection in post-elastic analysis of steel frames
A. Machowski & I. Tylek

Initial geometric imperfections of longitudinally stiffened panels in shear
L. Pavlovčič, D. Beg & U. Kuhlmann

Imperfection sensitivity of metal structures
J. Rządkowski

Influence of selected imperfections on behaviour of a spherical bar shell
J. Tasarek & R. Wróblewski
Seismic resistant optimum design of a welded steel frame supporting a pressure vessel
J. Farkas & K. Jármai

AHP methodology application for multi-criteria analysis of structural designs
G. Ginda

Fire resistant optimum design of a steel frame
K. Jármai, J. Farkas & K. Rzeszut

MINLP approach to the optimization of steel frames
U. Klanšek, T. Žula & S. Kravanja

Optimum design of transverse frames containing elements of variable stiffness in frameworks of buildings
V.O. Permyakov & O.B. Glitin

An optimum structural computer-aided design using hybrid genetic algorithm
V.O. Permyakov, V.V. Yurchenko & I.D. Peleshko

Expert system for determination of safety requirements of welded steel constructions
P. Sędek, R. Dusza & P. Gotkowski
Structural safety and assessment

Reliability analysis of corroded steel girder bridges
A.A. Czarnecki & A.S. Nowak

Reliability analysis of a steel girder by the hybrid Monte Carlo method
J. Kaliszuk & Z. Waszczyszyn

Experimentation in the design of load-bearing metal structures
V. Kvočák & O. Roth

Assessment method of semi-rigid steel connections basing on dynamic tests and neural networks
W. Łakota & L. Ziemiański

Reliability assessment of steel frames based on the SBRA method
P. Marek & V. Křivý

Design of steel structures for differentiated reliability levels
J.W. Murzewski

Failure identification in steel structure members based on wave propagation
P. Nazarko & L. Ziemiański

Risk and reliability-based design
Sz. Woliński
Effect of wind loading on structures

Medium-to-high rise steel buildings under wind loads
*L. Di Sarno & T.A. Wyatt*

Untypical steel arch – wind load
*T. Michałowski*

Actual wind load upon the Dubrovnik bridge
*B. Peroš, I. Boko & T. Šimunović*

Vortex shedding action on steel chimneys according to EN 1991-1-4:2005 (E)
*W. Włodarczyk*
Cable and prestressed structures

Computational model of electrothermally prestressed steel beam
T. Georgiev

Non-linear post-elastic analysis of a suspended cable considering creep effects
S. Kmet, M. Tomko & J. Brda

Load capacity of composite beams prestressed with external cables in aspect of adoption of initial prestressing force value
W. Lorenc & E. Kubica

Using of steel component in hybrid composite cable for saddle-shaped roof
D. Serduks & K. Rocens

Static and dynamic analysis of the 320 m steel mast
D. Ślęczka & L. Ziemiański
Miscellaneous problems: Architecture, glass and tolerances

The advantages of the structural system of Swiss Re Headquarter in London from the point of architecture
Y.K. Aktuglu

Lateral torsional buckling of glass beams
A. Luible & M. Crisinel

Architectural project of fuels station in Leżajsk city
A. Rybka & P. Such

Proposal of a new tolerances classification system
E. Urbańska-Galewska

Analysis of connections between glass and metal based on structural silicone
W. Żółtowski, M. Cwyl & P.A. Król
